Tom Granzow, <i>Kansas Hereford Assn.</i>	(785) 466-6790

A complimentary lunch will be served at 11:30

**Videos on all of the bulls and horses selling can be viewed
on our website TSRanch.net**

Photography by Brett Spader and Joe Rickabaugh

**All lots sell under the suggested Terms and Conditions of
the American Hereford Association. All persons attending
the sale do so at their own risk. The owners or sale staff
assumes no liability, for property loss or accidents that
may occur.**

AQHA Transfer

Certificate transfers will be made by the seller, but cost will be added to purchase price when making settlement. Costs set by AQHA are \$15.00 for current members, and \$55.00 for non- members. All colts have been implanted with a microchip ID number. All horses will have Coggins and health papers.

Performance Information

TS BULLS

As yearlings, TS bulls are weighed and turned out on native pasture with free choice mineral/salt all summer. In October, they are developed on a silage/hay/corn ration, but still run on pasture until sale time. They are ready to go to work. Bulls have been wormed; vaccinated with 7-way Black Leg; Brucellosis tested; BVD - PI tested; semen and Trich tested. All bulls will be accompanied with health papers.

JC BULLS

JC bulls have been wormed and vaccinated with 7-way Black Leg/with Haemophilus; Micro Plasma; Bova Shield 5; semen and Trich tested. Bulls will be accompanied with health papers.

HEIFERS

TS Ranch heifers have been wormed; OCV'd; 7-way Black Leg; Vibrio-lepto 5 (Vira Shield 6); Brucellosis tested; BVD - PI tested. All bred heifers will be pregnancy tested.

- "Jerrie" - big heart in smaller package. She will drag whatever you tie onto. She can go all day with no quit. Wes has used her to ship yearlings on, then go rope strays afterwards. Really likes to run to a stray and very strong on the ground to hold them by herself while you doctor. We didn't break her until she was 4 years old, so she has only been in use for a couple of seasons. *Note: can not be a broodmare. 14 Hands / 1000 lbs.
- Markings: Star. White on bridge of nose. White hairs above nostrils. Left half pastern partially white. Rich hind pastern white. Dark spots on hind coronets. No other markings.

- Very nice and gentle gelding. Farold Russett put 30 days of ground work in this gelding before Wes went straight to riding him. Nice running walk, smooth gathered-up trot and lope. Stands for farrier, quiet, and has not offered to buck. He should have some cow sense to go on and be an outstanding gelding. Wes has 30 days riding on him outside in the pasture. 14.2 Hands / 970 lbs.
- Markings: No markings.

- Trained reining mare, was Marcia's main ranch horse the previous 3 years. Layed her off to have a foal last year. Gets a little nervous if big herd turns and comes at her is her only vice. Gentle, stands like a statue for farrier. Broke, broke! Entry level reiner, weekend trail ride or aged cowboy or cowgirl can get along great. 14.2 Hands / 1140 lbs.
- Markings: Star, strip, and snip extending onto upper lip. No other markings.

QUARTER HORSES

Lot 65

Lot 66

Lot 67

HEREFORD BREED AVERAGE EPD'S

CE	BW	WW	YW	MM	M&G	MCE	SC	FAT	REA	MARB
1.1	3.3	48	78	20	44	1.3	0.8	0.003	0.31	0.09

Calving Ease Direct (CE)

CE EPDs are based on calving ease scores and birth weights. More positive EPDs are favorable and indicate easier calving.

Birth Weight (BW)

Birth weight is an indicator of calving ease. Larger BW EPDs usually, but not always, indicate more calving difficulty.

Weaning Weight (WW)

WW EPD reflects pre-weaning growth.

Yearling Weight (YW)

YW EPD reflects differences in the 365-day adjusted yearling weight for progeny. It is the best estimate of total growth.

Maternal Milk (MM)

The milking ability of a sire's daughters is expressed in pounds of calf weaned.

Maternal Milk & Growth (M&G)

M&G reflects what the sire is expected to transmit to his daughters for a combination of growth genetics through weaning and milking ability.

Calving Ease Maternal (MCE)

Indicates how easily a sire's daughters will calve at 2 years of age.

Scrotal Circumference (SC)

SC EPD is the best estimate of fertility. It's related to the bull's own semen quantity and quality.

Rib Fat (FAT)

Sires with low FAT EPDs are expected to produce leaner progeny.

Ribeye Area (REA)

Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny.

Marbling (MARB)

Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and quality grades.
